|  Location |  Correction                     |
|--------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| Page xii, second line of third paragraph                                                   | “infomal” should be “informal”.                                                                                  |
| Page 28, line 8 from bottom                                                                | <b>F</b> should be <b>R</b> .                                                                                    |
| Page 35, line 3 of Step 1                                                                  | $w_m$ should be $w_n$ .                                                                                          |
| Page 85, last line of statement of 3.68                                                    | $V$ should be $W$ and $W$ should be $V$ .                                                                        |
| Page 110, line 4                                                                           | “is the 0 vector in $V$ ” should be “equals $0 \in \mathbf{F}$ ”.                                                |
| Page 124, line 12 from bottom                                                              | “ <b>W</b> ” should be “ <b>We</b> ”.                                                                            |
| Page 144, second line of second paragraph in proof of 5.22                                 | “all complex vector spaces” should be “all vector spaces”.                                                       |
| Page 150, third line                                                                       | “vectors” should be “vector”.                                                                                    |
| Page 151, Exercise 4                                                                       | Assume that $p$ is a nonconstant polynomial.                                                                     |
| Page 152, Exercise 13                                                                      | Assume that $V$ is finite-dimensional.                                                                           |
| Page 157, line 6                                                                           | $v_1$ should be $v_2$ .                                                                                          |
| Page 157, line 9                                                                           | $v_1$ should be $v_3$ .                                                                                          |
| Page 166, first line                                                                       | “a” should be “a nonzero”.                                                                                       |
| Page 169, third sentence in last paragraph                                                 | “Every vector” should be “Every nonzero vector”.                                                                 |
| Page 175, last paragraph including the italicized note:                                    | “pairs” should be “ordered pairs”, four times total.                                                             |
| Pages 175 and 177, Examples 5.72 and 5.79                                                  | These examples have been rewritten to be in the context of complex vector spaces, to be consistent with 5.78.    |
| Page 179, line 8 above Exercises                                                           | “5B” should be “5C”.                                                                                             |
| Page 216, second line above 6.58                                                           | “be” should be “by”.                                                                                             |
| Page 229, paragraph above 7.4                                                              | Interchange $V$ and $W$ throughout (i.e. replace each $V$ with $W$ and each $W$ with $V$ ).                      |
| Page 234, second to last line of proof of 7.13                                             | “ $U$ ” should be “ $V$ ”.                                                                                       |
| Page 244, third line of proof of 7.27                                                      | “see 6.69” should be “see 4.13”.                                                                                 |
| Page 259, third line from end of proof of 7.49                                             | $\mathbf{F}^n$ should be $\mathbf{F}^m$ .                                                                        |
| Page 267, line 14 from bottom                                                              | “left” should be “right”.                                                                                        |
| Page 268, Exercise 2                                                                       | Assume that $T \neq 0$ .                                                                                         |
| Page 272, line 11                                                                          | “7.64(c)” should be “7.64(d)”.                                                                                   |
| Page 276, second and third lines from bottom                                               | “orthogonal” should be “orthonormal”.                                                                            |
| Page 292, line 4 above 7.110                                                               | Final $\Omega_1$ should be $\Omega_2$ .                                                                          |
| Page 307, Exercise 12                                                                      | “every vector” should be “every nonzero vector”.                                                                 |
| Page 316, line 2 of Exercise 10                                                            | “basis of $T$ ” should be “basis of $V$ ”.                                                                       |
| Page 320, second line of proof of 8.41                                                     | “8.22(c)” should be “8.22(b)”.                                                                                   |
| Page 321, line 3 of Example 8.43                                                           | “contraast” should be “contrast”.                                                                                |
| Page 327, beginning of last paragraph                                                      | “In the definition below” should be “In the following result”.                                                   |
| Page 336, third line from bottom of proof of 9.7                                           | Insert an open parenthesis before “ $f_1$ ”.                                                                     |
| Page 339, lines 6–8 of proof of 9.13                                                       | $C^{-1}TC$ should be $C^{-1}BC$ (three times).                                                                   |
| Page 339, line 8 of proof of 9.13                                                          | $C^tTC$ should be $C^tBC$ .                                                                                      |
| Page 341, lines 2 and 4 from bottom                                                        | $\sum_{j=1}^k$ should be $\sum_{j=1}^n$ .                                                                        |
| Page 350, first line of proof of 9.36                                                      | “ $n$ -linear form $\alpha$ on $V$ ” should be “ $n$ -linear form on $V$ ”.                                      |
| Page 351, line 6 from bottom                                                               | “either” should be “each”.                                                                                       |
| Page 360, parts (d) and (e) of 9.57                                                        | “to added” should be “is added”.                                                                                 |
| Page 361, paragraph after proof                                                            | First three occurrences of “9.48” should be “9.57”.                                                              |
| Page 366, matrix near bottom                                                               | Fix subscripts in rows 3 and $n$ .                                                                               |
| Page 367, last line                                                                        | $\det V$ should be $\det T$ ; “ $V$ has” should be “ $T$ has”.                                                   |
| Page 369, after Exercise 21                                                                | “denotes set” should be “denotes the set”.                                                                       |
| Page 373, and page 376                                                                     | $V \times W$ should be $V \otimes W$ .                                                                           |
| Page 375, first line of part (b)                                                           | “There there” should be “Then there”.                                                                            |
| Page 377, fourth line of proof of 9.83                                                     | Interchange $N$ and $M$ (three times), i.e. replace each $N$ with $M$ and each $M$ with $N$ .                    |
| Page 380, first line of part (b)                                                           | “There there” should be “Then there”.                                                                            |
| Page 385, top of first column                                                              | The index entry for “Bessel’s inequality” should be moved to follow the index entry for “Bernstein polynomials”. |
